

## DESIGN PROCESS

The following steps outline the process involved.

***First visit: Initial consultation and brief (1 hour)***

- Understand your ideas, wish list and requirements
- House/ Building style, lifestyle, interior and exterior flows
- Plant palette
- Budgetary considerations

***Second visit: Site analysis (1.25 Hours)***

- Full measure up of area to be designed
- Site analysis and levels shot if required
- Soil, drainage, wind and sun considerations

***Preliminary plan preparation: off site (8 Hours)***

- Preparation of preliminary plan drawn to scale
- General concepts, layout of main features and most plants chosen at this time

***Third visit: preliminary plan presentation (1 Hour)***

- Discussion and feedback on preliminary plan
- Opportunity for clients input and plan modifications
- Finalize planting design

***Finalize design: off site (Time depends on changes required)***

- Refine ideas and incorporate any changes
- Finalize plan including structures, materials, finishes as required
- Construction notes as required (not engineered construction details)
- Render plan and copy

***Presentation of plan: on site (1 Hour)***

- Present and discuss final plan
- Present and discuss

Hours specified for each step are an estimate based on a typical design charged at \$57.00per hour+GST subject to quotation.
